

Lean, Mean, Lighting Machine

Solar-Hybrid Light Tower Technology

Reduce engine emissions by up to 90%. Average reduction of 56-tons of CO₂. Help qualify for LEED points. #NETZERO

Solar Technology: 8-hour runtime per charge ✓

FREE Remote Cellphone Monitoring ✓

GPS Security Tracking ✓

136,000 LED Lumens ✓

Dawn to Dusk Feature: Auto Shut-Off during daylight ✓

Fuel/Carbon Footprint Savings

Cahill-brand Hybrid Light Towers burn approximately 1 gallon of diesel a day! Huge monthly savings.

35 days between refills, saves on extra fueling trip charges which also reduces the carbon footprint
